PROFILE

B.Tech Computer Science (Data Science) candidate with hands-on experience building and deploying Machine Learning, Deep Learning, and Generative AI (RAG) systems using Python, SQL, and Streamlit. Delivered production-grade projects achieving 81%+ model accuracy and document Q&A with hybrid retrieval and explainable AI. Strong analytical foundation with ability to convert data into actionable, deployable solutions for Data Analytics, Data Science, and AI/ML roles.

EDUCATION

- Shri Ramswaroop Memorial University, Lucknow, Uttar Pradesh** 2022-2026
B. Tech. in Computer Science and Engineering , 8.04 CGPA
- St. Xavier's School , Ambedkar Nagar, Uttar Pradesh** 2019 - 2020
12th Standard - Science , 85.4 Percent
- St. Xavier's School, Ambedkar Nagar, Uttar Pradesh** 2017-2018
10th Standard , 89.2 Percent

SKILLS

Technical - Python, SQL, Machine Learning, Deep Learning, Scikit-learn, TensorFlow, Feature Engineering, EDA, Matplotlib, Seaborn, Pandas, NumPy, Statistics, Regression, Classification, SMOTE, Cross-Validation, ANN, CNN, Prompt Engineering

Tools - Streamlit, FAISS, RAG, Gemini API, SHAP, Power BI, Tableau, Excel, GitHub, SQLite, AWS, BM25, Cross-Encoder

PROJECTS

- HyperRAG** | github.com/ms00000ms0000/HyperRAG 05/2026 - 07/2026
- Engineered a multi-document RAG assistant using hybrid retrieval (FAISS + BM25) and cross-encoder reranking, enabling accurate Q&A across enterprise-scale document sets with conversation memory and citations.
 - Powered by core Python, Streamlit, FAISS, BM25, Cross-Encoder, and Gemini API technologies
 - Combined 3-stage retrieval pipeline with Reciprocal Rank Fusion to minimize hallucinated responses.
- AtmosIQ** | github.com/ms00000ms0000/AtmosIQ 02/2026 - 04/2026
- Developed an AI-powered weather prediction system on 10,000 historical records, training 5 ML/DL models with 5-fold Stratified Cross-Validation, SMOTE, and automated macro-F1-based model selection for accuracy optimization.
 - Implemented using Python, Scikit-learn, TensorFlow, Streamlit, SQLite, SHAP, and cross-validation techniques.
 - Achieved 81.3% test accuracy with macro-F1 significantly improving from 0.55 to 0.80 via synthetic data expansion.

EXPERIENCE

- Data Science Intern** | [CodTech IT Solutions](#) | **Virtual** 01/2026 - 04/2026
- Built 4+ end-to-end machine learning and deep learning solutions using Python, Scikit-learn, TensorFlow, Pandas, CNN, and Streamlit, applying Linear Programming for optimization-driven predictive modeling.
 - Delivered predictive models for quality prediction, emotion detection, and rainfall forecasting, applying structured data preprocessing, model training, and deployment across diverse real-world use cases.
 - Gained practical exposure to full-cycle data science workflows spanning model development, evaluation, and deployment.
- Data Analytics Job Simulation Intern** | [Deloitte](#) | **Virtual** 06/2025 - 02/2026
- Analyzed telemetry and workforce datasets using Excel and Tableau, developing a 3-tier compensation fairness classification system to identify inequality patterns across roles and departments.
 - Designed interactive dashboards using forensic analytics to evaluate machine performance and workforce equality metrics, driving data-backed strategic recommendations.

CERTIFICATIONS

- Introduction to Data Analysis Using Python | [Google](#) 03/2026
- Data Analytics Essentials | [CISCO](#) 02/2026
- Data Science and Artificial Intelligence | [IBM](#) 09/2025

ACHIEVEMENTS

- Awarded by IBM for best project in college's IBM-certified Data Science & AI specialization track.
