PROFILE

B.Tech Computer Science (Data Science) candidate with hands-on experience applying data mining, data cleaning, and predictive modeling techniques to solve real-world problems, using Python, SQL, and Power BI. Skilled in building and training machine learning and Generative AI models, and in visualizing and communicating complex data as clear, actionable business insights. Delivered production-grade projects achieving 81%+ model accuracy through rigorous data verification and structured, automation-driven workflows. Strong technical curiosity and continuous-improvement mindset for Data Science, Analyst and AI/ML roles

EDUCATION

Shri Ramswaroop Memorial University, Lucknow, Uttar Pradesh 2022 – 2026
B. Tech. in Computer Science and Engineering, 8.04 CGPA
St. Xavier's School, Ambedkar Nagar, Uttar Pradesh 2019 – 2020
12th Standard – Science, 85.4 Percent

SKILLS

Technical: Python, SQL, Data Mining, Data Cleaning, Verification, Machine Learning, Deep Learning, Generative AI, Predictive Modeling, Feature Engineering, EDA, Statistics, Regression, Classification, Cross-Validation, SARIMA, Prophet, Prompt Engineering
Tools: Power BI, Tableau, Scikit-learn, TensorFlow, Streamlit, GitHub, FAISS, RAG, API, SQLite, Excel, AWS Basics, Google Cloud Basics

PROJECTS

E-Commerce Revenue Dashboard - github.com/ms00000ms0000/E-Commerce_Revenue_Dashboard 07/2026 – 08/2026

- Built an interactive Power BI dashboard analyzing revenue, customer behavior, and inventory pressure across 970K units sold and INR 2.17 billion in revenue, verifying data accuracy at each processing stage.
- Designed KPI cards, DAX measures, and dynamic slicers for real-time exploration of sales trends, documenting outputs in a structured, stakeholder-ready format.
- Transformed raw transactional data through Power Query cleaning and basic data checks to ensure consistency before final reporting.

HyperRAG - github.com/ms00000ms0000/HyperRAG 05/2026 – 07/2026

- Engineered a multi-document Q&A assistant using hybrid retrieval (FAISS + BM25) and cross-encoder reranking, verifying outputs against expected results at each pipeline stage.
- Built using Python, Streamlit, FAISS, BM25, Cross-Encoder, and Gemini API, incorporating structured logging to document outcomes and support traceability.
- Combined a 3-stage retrieval pipeline with Reciprocal Rank Fusion, testing and validating results to minimize errors before deployment.

AtmosIQ - github.com/ms00000ms0000/AtmosIQ 02/2026 – 04/2026

- Developed a predictive model on 10,000 historical records, preparing and verifying test data across 5 ML/DL models using 5-fold Stratified Cross-Validation.
- Implemented using Python, Scikit-learn, TensorFlow, and SQLite, performing structured result analysis and documenting outcomes in prescribed formats.
- Achieved 81.3% test accuracy with macro-F1 improving from 0.55 to 0.80, verifying results against expected benchmarks before finalizing the model.

EXPERIENCE

Data Science Intern | CodTech IT Solutions | Virtual 01/2026 – 04/2026

- Built 4+ end-to-end machine learning and deep learning solutions using Python, Scikit-learn, TensorFlow, and Pandas, preparing and verifying test data as instructed.
- Delivered predictive models for quality prediction, emotion detection, and rainfall forecasting, assisting in unit testing and documenting results across real-world use cases.
- Gained practical exposure to structured testing and verification workflows spanning model development, evaluation, and deployment.

Data Analytics Job Simulation | Deloitte | Virtual 02/2026

- Analyzed telemetry and workforce datasets using Excel and Tableau, developing a 3-tier compensation fairness classification system to identify inequality patterns.
- Designed interactive dashboards using forensic analytics to evaluate performance metrics, documenting findings for business stakeholders.

CERTIFICATIONS

- Introduction to Data Analysis Using Python | Google 03/2026
- Data Analytics Essentials | CISCO 02/2026
- Data Science and Artificial Intelligence | IBM 09/2025

ACHIEVEMENTS

- Awarded by IBM for best project in college's IBM-certified Data Science & AI specialization track.
